

ARE YOU READY TO 'BLITZ WITH THE BASIN?

Starting on Earth Day, April 22, 2026, follow along with these weekly challenges to take your BioBlitz game to the next level!

Join our iNaturalist: 	aquatic	terrestrial
April 22 - 29	Upside down and all around! Capture a photo of a plant or animal reflected on a body of water.	Places to be, things to see! Take a picture of an animal in action - Flying or climbing, swimming or crawling.
April 30 - May 6	Fins and wings, gills and bills! These adaptations help animals to live in and enjoy freshwater. Take a picture of an animal with at least one of these adaptations!	Nature is filled with symmetry. Find and capture a pattern that repeats itself, like butterfly wings, veins on a leaf, or something else.
May 7 - 13	Here's a clue, morning dew! Snap a picture of water droplets on a plant.	Duck down low, or look in a shadow! This week, take a picture of something that is an inch or less tall.
May 14 - 23	Splish Splash! Fresh, clean water is good for all. Find an animal drinking, floating, or swimming in water.	Come out, come out, wherever you are! Take a photo of a living thing that is hard to spot due to camouflage.
